Those who copy and those who provide the copy will be penalised heavily.</i></b>

# ASSESSMENT OUTLINE

**Competency Code:** ICAWEB411A  
**Cluster Name:** Web Programming 2

---

## 4. Required Features

Use a standard text editor such as Notepad or Notepad++ to code your website and introduce dynamic features via the use of client side scripts written in JavaScript and jQuery.

**EACH FEATURE MUST WORK WITHIN THE CONTEXT OF YOUR WEBSITE (eg: you cannot add a calculator to a page just for the sake of having to code one – the calculator should have a purpose associated with the topic of the website, such as calculate the cost of flights and accommodation on a travel website)**

Each feature in the checklist will be rated poor, average or good. **You will be deemed competent if the majority of your items rate average or above.**

**Note: Items marked with an \* must rate at average or good.**

### Javascript Features

\* An external JavaScript file for some of your user defined code

Display the current date

A clock

Image rollovers

\* Time controlled image cycling

Prompt popup box

Confirm popup box

Alert popup box

A print feature

A calculation

Use of the innerHTML property to change some text on a web page

\* A double click event

Open a new popup window

\* Close button on a popup window

Email syntax validation

Checkbox selection validation

\* Numeric input validation

Focus the cursor in the first input element of a form

\* Error free scripts

### jQuery Features

\* jQuery slideshow

\* jQuery hidden pane
